<b>Reason for Request</b>		
Example - demolition, refurbishment, gas no longer required etc		
<b>Site Anomalies and Additional Information</b>		
<b>Gas Meters on Site</b>		
Property Name / Number	Meter Point Reference Number	Location
<b>Notes</b>		
<p>Please provide a map of the site indicating the site boundary and any known services and mains on site.</p> <p>If you request the disconnection of the gas mains / services supplying a development then you must ensure that any meters are removed prior to the disconnections being carried out. Disconnections cannot be carried out if meters are still present on site. Failure to do so could result in abortive visit charges and work not being carried out on our planned dates.</p> <p><b>Should you wish to have your meter removed by Squire Energy, then please indicate this on the form above.</b></p> <p>If a site visit is required or gas mains are to be isolated (rather than single services) then delays can occur in the times scales to produce a quotation. All disconnected pipes and fittings will be left safe and will remain in situ / on site. Meter kiosks / housings are your property and will not be removed from site.</p>
